Chemistry Paper 3, WASSCE (PC), 2017 - WAEC

The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

Ghana National Health Insurance Scheme (NHIS) was established in 2003 as a major vehicle to achieve the country's commitment of Universal Health Coverage. The government has earmarked value-added tax to finance NHIS in addition to deduction from Social Security Trust (SSNIT) and premium payment. However, the scheme has been running under deficit since 2009 due to expansion of coverage, increase in service use, and surge in expenditure. Consequently, Ghana National Health Insurance Authority (NHIA) had to reduce investment fund, borrow loans and delay claims reimbursement to providers in order to fill the gap. This study aimed to provide policy recommendations on how to improve efficiency and financial sustainability of NHIS based on health sector expenditure and NHIS claims expenditure review. The analysis started with an overall health sector expenditure review, zoomed into NHIS claims expenditure in Volta region as a miniature for the scheme, and followed by identification of factors affecting level and efficiency of expenditure. This study is the first attempt to undertake systematic in-depth analysis of NHIS claims expenditure. Based on the study findings, it is recommended that NHIS establish a stronger expenditure control system in place for long-term sustainability. The majority of NHIS claims expenditure is for outpatient consultations, district hospitals and above, certain member groups (e.g., informal group, members with more than five visits in a year). These distribution patterns are closely related to NHIS design features that encourages expenditure surge. For example, year-round open registration boosted adverse selection during enrollment, essentially fee-for-service provider mechanisms incentivized oversupply but not better quality and cost-effectiveness, and zero patient cost-sharing by patients reduced prudence in seeking care and caused overuse. Moreover, NHIA is not equipped to control expenditure or monitor effect of cost-containment policies. The claims processing system is mostly manual and does not collect information on service delivery and results. No mechanisms exist to monitor and correct providers' abnormal behaviors, as well as engage NHIS members for and engaging members for information verification, case management and prevention.

“One of the most vital and original novelists of her generation.” —Larissa MacFarquhar, *The New Yorker* From the bestselling author of *Americanah* and *We Should All Be Feminists* Fifteen-year-old Kambili and her older brother Jaja lead a privileged life in Enugu, Nigeria. They live in a beautiful house, with a caring family, and attend an exclusive missionary school. They're completely shielded from the troubles of the world. Yet, as Kambili reveals in her tender-voiced account, things are less perfect than they appear. Although her Papa is generous and well respected, he is fanatically religious and tyrannical at home—a home that is silent and suffocating. As the country begins to fall apart under a military coup, Kambili and Jaja are sent to their aunt, a university professor outside the city, where they discover a life beyond the confines of their father's authority. Books cram the shelves, curry and nutmeg permeate the air, and their cousins' laughter rings throughout the house. When they return home, tensions within the family escalate, and Kambili must find the strength to keep her loved ones together. *Purple Hibiscus* is an exquisite novel about the emotional turmoil of adolescence, the powerful bonds of family, and the bright promise of freedom.

This publication, prepared jointly by the WHO, the World Meteorological Organization and the United Nations Environment Programme, considers the public health challenges arising from global climate change and options for policy responses, with particular focus on the health sector. Aspects discussed include: an overview of historical developments and recent scientific assessments; weather and climate change; population vulnerability and the adaptive capacity of public health systems; the IPCC Third Assessment report; tasks for public health scientists; the health impacts of climate extremes; climate change, infectious diseases and the level of disease burdens; ozone depletion, ultraviolet radiation and health; and methodological issues in monitoring health effects of climate change.
