Problem 2: In chemical engineering we often employ the Van Laar equations for correlating activity coefficients. In particular for a binary system (i.e., two chemical species) the equations are $A B = \exp \ln 2 = \exp \left[\frac{1+(x_1/x_2)(A/B)}{1+(x_1/x_2)(B/A)} \right]$ (1) The excess Gibbs free energy is given in terms of the activity coefficients as $\ln \gamma_1 = x_1 \ln \gamma_2$ (2) [RT] We have been given two good ...

This highly readable direct practice text offers a practical introduction to the theories and skills necessary to engage in effective, strengths-based practice. Developed specifically to address the issues facing students as they prepare for direct practice in today's world, Direct Practice for Social Work interweaves diversity and social justice through out the chapters and teaches students how to make the connections between major theories and real-world situations. Written in an engaging style by experienced authors, this text encourages the development of students critical thinking skills while demonstrating the practical applications of theory. Highlights include chapters opening case studies, numerous case studies in each chapter, and more modeled responses, sample dialogues and exercises than are found anywhere else. Comprehensive coverage of the major theories and adherence to CSWE guidelines make this text an invaluable addition to any professional social work educational or professional library.

Offering a balanced approach to problem-solving issues in a complex and changing world, this book focuses specifically on the subject of problem solving in policing. Featured selections include chapters on domestic security, disorderly youth, auto theft, prostitution, gang delinquency and crime in public housing. Other notable selections discuss the role of supervising police personnel engaged in problem solving, advances in using this approach in criminal investigations, solving serial crimes, preparing for terrorism, and developing patrol officers as effective first responders to active violence.

Give your soon-to-be second grader a head start on their upcoming school year with Summer Bridge Activities: Bridging Grades 1-2. With daily, 15-minute exercises kids can review two-digit place value and verb tenses and learn new skills like measurement and compound words. This workbook series prevents summer learning loss and paves the way to a successful new school year. --And this is no average workbook! Summer Bridge Activities keeps the fun and the sun in summer break! Designed to prevent a summer learning gap and keep kids mentally and physically active, the hands-on exercises can be done anywhere. These standards-based activities help kids set goals, develop character, practice fitness, and explore the outdoors. With 12 weeks of creative learning, Summer Bridge Activities keeps skills sharp all summer long!

Delight your kids with mind-bending, rib-tickling, brain-boosting fun! These Summer Bridge Activities(TM) Fact Cards are a great companion to the award-winning workbook series, providing hours of fun for everyone. This boxed set includes two decks of 79 full-color cards, which are held together with a corner grommet to keep the cards from getting lost and to make it easy for children of all ages to hold and flip through the cards no matter where they are. The set includes 158 cards featuring hundreds of preschool to kindergarten activities such as jokes, math, fun facts, language arts, word play, picture puzzles and mind-bogglers. All of the activities are self-checking, the answers provided on the back of each card.

The primary purpose of fitness and body composition standards in the U.S. Armed Forces has always been to select individuals best suited to the physical demands of military service, based on the assumption that proper body weight and composition supports good health, physical fitness, and appropriate military appearance. The current epidemic of overweight and obesity in the United States affects the military services. The pool of available recruits is reduced because of failure to meet body composition standards for entry into the services and a high percentage of individuals exceeding military weight-for-height standards at the time of entry into the service leave the military before completing their term of enlistment. To aid in developing
