This fourth edition of this best-selling core history textbook offers a richly illustrated, single volume, narrative introduction to African history, from a hugely respected authority in the field. The market-leading range of illustrated material from prior editions is now further improved, featuring not only additional and redrawn maps and a refreshed selection of photographs, but the addition of full colour to make these even more instructive, evocative and attractive. Already hugely popular on introductory African History courses, the book has been widely praised for its engaging and readable style, and is unrivalled in scope, both geographically and chronologically - while many competitors limit themselves to certain regions or eras, Shillington chronicles the entire continent, from prehistory right up to the present day. For this new edition, both content and layout have been

thoroughly refreshed and restructured to make this wealth of material easily navigable, and even more appealing to students unfamiliar with the subject.

Now fully revised and updated, this classic text offers an illustrated and critical narrative introduction to the history of Africa from earliest times to the present. Beginning with the evolution of mankind itself, the book traces the history of Africa through the millennia of the ancient world to the centuries of medieval and modern Africa. The clear and simple language and the wealth of carefully chosen maps and photos combine to make an essential and accessible text.

In a single volume, History of Africa offers readers a richly illustrated narrative introduction to the history of the entire continent, from earliest times through to the present day. Building on the book's established reputation and success, this third edition has been revised and updated throughout in the light of new research and recent events. A companion website now also supports the text. Kevin Shillington traces the history of the continent through the ancient world to medieval, modern and contemporary Africa. He explores the early emergence of farming; the kingdoms of Ancient Egypt, Aksum and Meroe; medieval empires; the spread and impact of Islam; the role of trade and religion; and the development of Africa's wide range of pastoral, agricultural and hunting societies. History of Africa, third edition: • contains nearly 100 specially-drawn maps and almost 200 illustrations, a number of which are new for this edition • takes a deliberately African viewpoint of the European involvement in Africa • provides a carefully constructed examination of the colonial period and the problems of post-colonial Africa • presents expanded coverage of modern Africa with more on issues such as economic concerns, globalization, international organisations, climate change, HIV/AIDS, and the role of China • opens with a new Introduction which includes a helpful historiographical overview • features a companion website offering additional historical debate and critical discussion to complement specific parts of the text; key points to remember for each chapter; a variety of essay questions and exercises; and other resources to enhance the learning experience. Eminently clear and approachable, History of Africa remains the essential text for anyone with an interest in this remarkable continent and its fascinating past.

Now fully revised and updated, this classic text offers an illustrated and critical narrative introduction to the history of Africa from earliest times to the present. Beginning with the evolution of mankind itself, the book traces the history of Africa through the millennia of the ancient world to the centuries of medieval and modern Africa. The clear and simple language and the wealth of carefully chosen maps and photos combine to make an essential and accessible text.

There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. The History of Africa redresses this by letting the perspectives of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to African history.

Describes major events in African history, from ancient times through the twentieth-century, discussing each event's historical significance, social and geographical context, and its long-term impact.

Long before the rise of New World slavery, West Africans were adept swimmers, divers, canoe makers, and canoeists. They lived along riverbanks, near lakes, or close to the ocean. In those waterways, they became proficient in diverse maritime skills, while incorporating water and aquatics into spiritual understandings of the world. Transported to the Americas, slaves carried with them these West African skills and cultural values. Indeed, according to Kevin Dawson's examination of water culture in the African diaspora, the aquatic abilities of people of African descent often surpassed those of Europeans and their descendants from the age of discovery until well into the nineteenth century. As Dawson argues, histories of slavery have largely chronicled the fields of the New World, whether tobacco, sugar, indigo, rice, or cotton. However, most plantations were located near waterways to facilitate the transportation of goods to market, and large numbers of agricultural slaves had ready access to water in which to sustain their abilities and interests. Swimming and canoeing provided respite from the monotony of agricultural bondage and brief moments of bodily privacy. In some instances, enslaved laborers exchanged their aquatic expertise for unique privileges, including wages, opportunities to work free of direct white

supervision, and even in rare circumstances, freedom. Dawson builds his analysis around a discussion of African traditions and the ways in which similar traditions—swimming, diving, boat making, even surfing—emerged within African diasporic communities. Undercurrents of Power not only chronicles the experiences of enslaved maritime workers, but also traverses the waters of the Atlantic repeatedly to trace and untangle cultural and social traditions.

Most of us still know less about Africa's past and peoples than we do about the continent's wild animals. And what we do know is colored by romance - safaris and treks and camel caravans, Solomon's mine and Tutankhamun's curse, the shores of Tripoli and the snows of Kilimanjaro. Yet the ancestor of all humankind may have lived in Africa. The world's longest-lived, literate civilization was African. Through the ages, great civilizations rose and fell in what was once called "darkest" Africa, leaving behind mysterious fortresses and splendid art. Christianity and Islam battled age-old beliefs - and each other. Traders on camels were followed by explorers in caravels and by a plague of invaders, hungry for ivory and diamonds and the "black gold" of slavery. In just the last half century, independence has swept away the old maps and colonial ways to jar the balance of the world. Here is Africa's story.

From Calvinist to Catholic, from Charismatic to AmaZioni, the Rainbow Nation has one of the most colourful, variegated, and bewildering array of Christian churches in the world. Where on earth did they all come from? How did they develop? What do they believe? How are they related to one another? In this clear and readable history of Christianity in South Africa, Kevin Roy answers these questions with comprehensive, succinct and rigorous historical analysis with sympathy and honesty. Dr Roy does not shy away from the failures and sins of the participants in this story that intertwines with the history of the peoples and tribes in South Africa. This book is a testimony of divine love and patience in the midst of human folly and frailty, of successes and faithful service to God.

In 1957 Ghana became one of the first sub-Saharan African nations to gain independence from colonial rule. Over the next decade, hundreds of African Americans--including Martin Luther King Jr., George Padmore, Malcolm X, Maya Angelou, Richard Wright, Pauli Murray, and Muhammad Ali--visited or settled in Ghana. Kevin K. Gaines explains what attracted these Americans to Ghana and how their new community was shaped by the convergence of the Cold War, the rise of the U.S. civil rights movement, and the decolonization of Africa. Kwame Nkrumah, Ghana's president, posed a direct challenge to U.S. hegemony by promoting a vision of African liberation, continental unity, and West Indian federation. Although the number of African American expatriates in Ghana was small, in espousing a transnational American citizenship defined by solidarities with African peoples, these activists along with their allies in the United States waged a fundamental, if largely forgotten, struggle over the meaning and content of the cornerstone of American citizenship--the right to vote--conferred on African Americans by civil rights reform legislation.
