An eye-opening short book by the international bestselling writer of *Born on a Blue Day* and *Thinking in Numbers*. Have you ever wondered how neurotypicals - so called 'normal' people - come across to those who are on the autistic spectrum? What would an instruction manual about being an average human being look like to them? And actually, would it be that different, fundamentally, to a field guide about autistic people

modern life as seen through the eyes of someone always on the outside. Rather wonderfully, it illustrates the eccentricity inherent in every kind of mind, reminding us of the little-noticed strangeness of our common humanity, while subtly questioning what it means to be thought 'normal'.

The irresistibly engaging book that "enlarges one's wonder at Tammet's mind and his all-embracing vision of the world as grounded in numbers" (Oliver Sacks, MD). Thinking in Numbers is the book that Daniel Tammet, mathematical savant and bestselling author, was born to write. In Tammet's world, numbers are beautiful and mathematics illuminates our lives and minds. Using anecdotes, everyday examples, and ruminations on history, literature, and

more, Tammet allows us to share his unique insights and delight in the way numbers, fractions, and equations underpin all our lives. Inspired variously by the complexity of snowflakes, Anne Boleyn's eleven fingers, and his many siblings, Tammet explores questions such as why time seems to speed up as we age, whether there is such a thing as an average person, and how we can make sense of those we love. His provocative and inspiring new book will change the way you think about math and fire your imagination to view the world with fresh eyes.

In the current revised and expanded edition of Born on the Wrong Planet, Erika takes us into the confusing and often tumultuous years of dating, and finally marriage to John, a young man who is also on the spectrum whom she met in college. Throughout, Erika's unique language skills and her fresh perspective on the world combine into a both delightful and enlightening read. In Erika's own words she shares that, "even if you feel like an alien, that doesn't negate your potential as a successful human being or your ability to realize your potential."

Augusten Burroughs Ever since he was young, John Robison longed to connect with other people, but by the time he was a teenager, his odd habits—an inclination to blurt out non sequiturs, avoid eye contact, dismantle radios, and dig five-foot holes (and stick his younger brother, Augusten Burroughs, in them)—had earned him the label “social deviant.” It was not until he was forty that he was diagnosed with a form of autism called Asperger’s syndrome. That understanding transformed the way he saw himself—and the world. A born storyteller, Robison has written a moving, darkly funny memoir about a life that has taken him from developing exploding guitars for KISS to building a family of his own.
