Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This is a unique case study reference for students in the medical surgical nursing core course and a review/workbook for students about to embark on the NCLEX-RN exam. Unlike other reviews, the book embeds required information into compelling, unfolding case studiesó studies that evolve over timeó in order to promote active learning and facilitate knowledge retention. These unfolding case studies are of particular value because they closely mimic real-life situations in nursing and provide situational mental models that assist students with problem-solving and critical thinking techniques. The unfolding case study method also assists in the development of skills that are important for NCLEX-RN success in assessment, planning, intervention, and evaluation of patient care. All content areas required for NCLEX-RN successó safe and effective care, health promotion, physiological and psychological integrity- are interwoven in an enjoyable format that dispels the drudgery of straightforward memorization. A variety of NCLEX-style question formats are used throughout the book to help students assess their own learning. Additionally, eResource links to additional information are included throughout the book. Key Features: Uses unique unfolding case study method to present medical-surgical concepts Promotes active learning and knowledge retention Develops problem-solving and critical thinking skills Provides all of types of NCLEX-style questions for exam preparation Offers eResources throughout the Review for enhanced learning opportunities

A collection of twenty-two unique and provocative real-life medical-surgical nursing case studies with rationales, this resource emphasizes holistic nursing care as it helps sharpen critical thinking skills and strengthens clinical competence.

Med-Surg Success in the Palm of Your Hand Master the art of critical thinking and clinical reasoning with this book designed to help you develop and utilize the nursing process and prioritization in real to life case studies surrounding the most commonly seen and tested patient diagnosis. After Reading This Book You Will Improve your clinical reasoning skills Develop confidence in answering difficult Med-Surg questions Become familiar with the most common patient disorders Learn how to answer hard NCLEX(r) style questions Improve prioritization skills Master the nursing process in clinical settings Case Study Layout Client case presentation Questions regarding client background Case progression Additional critical thinking questions Rational Each case study includes 8-15 questions that require you to think beyond the most simple rational. Case studies also include highly detailed and in depth rationales (over 500 words) to insure that you are learning as much as possible about the disease process. Disease Processes Covered in this Book Congestive Heart Failure Ischemic Stroke Pneumothorax Hypertensive Crisis End Stage Renal Disease Cirrhosis Acute MI (STEMI) Hypothyroidism End Stage Renal Disease COPD Seizure Disorder Sepsis CABG Pancreatitis Respiratory Acidosis The selection process for the 15 diseases covered in this book included drawing on my experience as a CCRN in a large metropolitan ICU, speaking with other nurses in various specialties, referring to a mountain of NCLEX(r) prep books, reviewing CCRN study materials, speaking with physicians, and reviewing NIH (National Institute of Health) data regarding the most commonly presenting conditions in hospitals.
