Most often, this factor is tied to a firm's market niche. The more a construction company is specialized in a growing and well-funded market, the better its valuation prospects. Unfocused companies are unlikely to receive a better than average valuation. Other factors considered include revenue concentration (7.16) and marketing strategy (6.00). An acquiring firm almost always looks for synergies that exist between the two companies (8.00).

The external factors affecting a business comprise of such factors as technology, government, and its policies, economic forces and elements, socio-cultural factors, and international factors. These are factors which business cannot control. We shall now explain these internal and external factors of business in detail.

Internal and External Factors Affecting Business

Income is a major factor in the valuation of any business. Particularly, someone appraising the value of a business will look at historical trends in your income. For example, an increase in gross income over the past five years will have a positive impact on the valuation, while a downward trend in income may serve to devalue the business.
