Alternatively, American political scientist Joseph Nye, co-founder of the international relations theory of neoliberalism, generalized the term to argue that globalism refers to any description and explanation of a world which is characterized by networks of connections that span multi-continental distances; while globalization refers to the increase or decline in the degree of globalism.

The paradox of 'globalization' is that it both weakens and activates social forces of resistance. This book establishes the centrality of 'the political' in our understanding of globalization and explores the new 'strategies of resistance' emerging on local, national, regional and global scales. Its impressively wide-ranging set of contributors engage in re-thinking what practices now constitute viable political strategies in the world economy, focusing on popular responses to neoliberal globalization and the rearticulation of society, politics and the state.

In this 2010 edition of their book on the economic development of the Middle East and North Africa, Clement Henry and Robert Springborg reflect on what has happened to the region's economy since 2001. How have the various countries in the Middle East responded to the challenges of globalization and to the rise of political Islam, and what changes, for better or for worse, have occurred? Utilizing the country categories they applied in the previous book and further elaborating the significance of the structural power of capital and Islamic finance, they demonstrate how over the past decade the monarchies (as exemplified by Jordan, Morocco and those of the Gulf Cooperation Council) and the conditional democracies (Israel, Turkey and Lebanon) continue to do better than the military dictatorships or 'bullies' (Egypt, Tunisia and now Iran) and 'the bunker states' (Algeria, Iraq, Libya, Sudan, Syria and Yemen).

Politics of Globalization presents an up-to-date perspective on the kaleidoscopic politics of globalization. The authors analyze the existing definitions of capitalism and argue that globalization and the consequent growing multi-polarity in world politics is not a crisis but a proliferation of capitalisms. This network of capitalisms becomes the framework of the politics of the new globalization. This compilation by social scientists across the globe is an empirical and theoretical exploration of the political responses to globalization. The authors examine the impacts of the decline of US domination in trade and finance and compare it to the rise of Asian economies, with special focus on China and India. The articles explore the multiple impacts of globalization: the impact of new global political relations on 21st century international division of labour, the relation between gender equality and globalization, trade union politics and globalization, ecological politics and globalization discourse, dual citizenship and global politics, and globalization of language and culture. They also discuss the anti-globalization movements and argue that these might change the course of current trends in globalization processes. This book will hold great value for social scientists and economists as well as politicians, social activists, and other professionals interested in the study of globalization and its consequences.

"Brawley provides us with a remarkably balanced, systematic, and nevertheless accessible survey of the facts and debates pertaining to the issue of globalization." - Daniel Verdier, Ohio State University

For decades F. H. Cardoso has been among the most influential of Latin American scholars, his writings on globalization, dependency, and politics having reached a world-wide audience. This book, the third by Cardoso to appear in English, is the first to incorporate essays written during his tenure as president of Brazil. The transformation of Cardoso's economic and political approach is nowhere better documented than in this broad-ranging collection of writings that span Cardoso's early theoretical work through his pragmatic agenda for Brazil in a rapidly changing world economy. The book also traces the development of one of the world's leading intellectuals, who took theory into the arena of policy when he became head of state.

This book argues that basing citizenship on singular and individual membership in a nation-state is no longer adequate, since the nation-state model itself is being severely eroded. It examines issues of citizenship and difference in the Asia-Pacific region.

This book examines how globalization shapes the construction of socio-cultural and political attachments and their implications for citizenship, nationhood, ethnicity, and gender. Topics include the commodification of citizenship, the spread of nationalist populism, the rise of ISIS, and women's transnational activism.

Applying concepts derived from the study of international and comparative politics, Cohen (political science, Westminster College) analyzes the impact of globalization on US domestic politics. Focusing on the obvious issues of trade and the less obvious areas of immigration and language policy, he demonstrates that globalization is both the cause and result of a new relationship between government, corporations, and citizens within the US. He argues that the outcomes of conflicts spurred by globalization will determine the future of American political life. c. Book News Inc.

The broad range of selections in this reader gives students a foundation for understanding globalization. Each of the four sections—an introduction to the topic; political economy; civil society; and governance—examine the national and intra-national implications of globalization. The readings present views both for and against globalization and include scholarly discussions and a diverse range of selections on emerging topics. The writing style and format of the readings make them accessible to students at all levels of understanding.

The politics of globalization include nation-states pursuing power, multinational firms seeking profits for their shareholders, coalitions and networks attempting to promote particular visions of future possible worlds, resistance groups ranging from the non-violent to the murderous, and ordinary people struggling to feed their families and secure their futures in a rapidly changing world. Globalization and International Political Economy examines processes of globalizing capitalism and the complex politics which are emerging from it—processes and struggles which will determine the shape of our world in the 21st century.
