Hashima
Hashima Island (??) (or simply Hashima, as -shima is a Japanese suffix for island), commonly called Gunkanjima (???; meaning Battleship Island), is an abandoned island of Nagasaki, lying about 15 kilometers (9 miles) from the center of the city. It is one of 505 uninhabited islands in Nagasaki Prefecture.The island's most notable features are its abandoned concrete buildings ...

Hashima Island - Wikipedia

As a result of these efforts, Hashima's annual coal production reached a peak of 410,000 tons in 1941. But it was an achievement that exacted a heavy toll in human suffering - Korean and Chinese replaced miners during the Second World War and were subject to poor conditions and starvation.

Hashima Island: A Forgotten World

As part of a day-long visit to Nagasaki, this comprised the Main Event - a boat trip out here to Hashima Island or Gunkanjima or 'Battleship Island' - 40/45 mins out and 40/45 back with 30 in between going round and round and round again. What is it ? A large Rock in the sea with a load of abandoned derelict buildings on it. Last occupied (over ...

Hashima (??), also known as Gunkanjima (???) or "Battleship Island", is a 1.2-km 2 Japanese island. It is one of 505 uninhabited islands in Nagasaki Prefecture on the island of Kyushu.. The island is on a tentative list of UNESCO World Heritage Sites.

Hashima - Simple English Wikipedia, the free encyclopedia

Hashima, also known as Gunkanjima ('battleship island' – so named because of its ship-like silhouette), is an island off the coast of Nagasaki in southwest Japan. If you've seen the James Bond movie Skyfall (2012) you may already know this place: that desolate island that was the villain's lair – Hashima provided the inspiration and the ...

Visiting Japan's ghost island of Hashima - Lonely Planet

Hashima Island, once a mecca for underea coal mining, was a sharp representation of Japan's rapid industrialization. Also known as Gunkanjima (meaning Battleship Island) for its resemblance to a Japanese battleship, Hashima functioned as a coal facility from 1887 until 1974.

Hashima, after all, was nothing more than a rim of coal slag packed around the circumference of a bare rock. A movie shot there by Shochiku Co. Ltd. in 1949 was aptly entitled Midori Naki Shima (The Greenless Island). The initiation of a planting campaign in 1963 was a sign of the residents' first hard-won taste of leisure. Using soil from ...

From 1916 to 1945, Japanese governments recruited Korean laborers from South Korea for coal mining. The laborers ranged from thirteen to nineteen years old-most of them were still middle school or high school students. Hoping to earn money as the government promised, but unaware of the hostility and danger to which they would be exposed, 600 young Korean laborers were sent to an island called Hashima Island. Hashima Island has been desolate since 1974 after its coal resources were depleted. Although the island is no longer in use, the current condition of the architecture of Hashima Island speaks the truth of the history. The perimeter of the island is surrounded by walls; the laborers were never able to escape the hostile situation nor had a chance look at the world outside of the island. The wall is composed of three different layers: pre-cast concrete, rocks, and noise barrier; the wall as a whole is three-meters thick. Although the physical distance between the interior and exterior of the island is only three meters, the historical distance stopped in the thickness of the wall. The wall, which is the most problematic yet potentially useful component of the island, has to be interrupted architecturally in order to re-vitalize the timeline of the Korean laborers. My thesis is to reveal the neglected and hidden histories of Korean forced laborers in Hashima Island through intervention upon the existing walls. By creating an outdoor city museum by transforming the wall, the architecture of the island is re-discovered. The wall is punctured, chiseled, carved, and shaped to create an episodic and linear path along the wall and to be in communication with the surrounding water, mountains, and ultimately the users. The wall allows water to overflow into the site, delineating the lowest topography, and provides access to the underground basement dormitories of the Korean laborers. The wall is no longer a static barricade; it performs as a moving network among the existing materials of the island and the visitors.

In these buoyant and inventive stories, Karen Tei Yamashita transfers classic tales across boundaries and questions what an inheritance—familial, cultural, emotional, artistic—really means. In a California of the sixties and seventies, characters examine the contents of deceased relatives' freezers, tape-record high school locker-room chatter, or collect a community's gossip while cleaning the teeth of its inhabitants. Mr. Darcy is the captain of the football team, Mansfield Park materializes in a suburb of L.A., bake sales replace ballroom dances, and station wagons, not horse-drawn carriages, are the preferred mode of transit. The stories of traversing class, race, and gender leap into our modern world with and humor.

Twisted Mirrors is a collection of papers which examine the monstrous in relation to humanity. Culled from an international conference, these essays were written by scholars from a variety of fields and represent a broad cross-section in the scholastic investigation of the monstrous.

Publisher Description

This fiction deals with Hashima, a man who finds the ways to get the fuel without reaching for the rich people who get much fuel in their countries. He gets fuel from the brightness by his research and he runs the vehicles which makes the president happy by his invention. The President tries to make that Country go without any trace which runs the vehicles without buying the fuels from other countries. Shima succeeds in finding a liquid which may cause much destruction after getting the sponsorship from the President. The president comes to know that he will not get the order for the fuel from the country which is using the brightness and he orders for the attack. The liquid gets activated in his country before it is launched. Read this fiction to know what happens to Hashima, Shima and to the others.

A multidisciplinary collection which brings together cutting edge research about the cultural politics of space.
