IICRC S500 does not attempt to include exhaustive performance characteristics or standards for the manufacture or installation of structural components, materials and contents (personal property). The IICRC S500 Standard and Reference Guide is presented using a two-part format: the standard itself and a supplementary reference guide.

change phase from a solid or liquid to a gas and understand how to assess, manipulate and control the water molecule a regardless of its phase. However, over the course of 3 decades, compromises in accuracy and agenda driven messages have found their way into some formal education programs and even the industry Standards. These compromises and flawed messages are well documented, yet they are persistently taught as fact to the innocent students and even the consuming public and insurance representatives. Structural restorative drying leaders identify and reject such propaganda and compromises. Leadership in Restorative Drying is the first comprehensive resource guide to clearly identify several of the scientific errors that permeate the structural restorative drying industry, and substitute it with easy to understand explanations and descriptions. Leaders in restorative drying services are able to engineer an effective drying protocol that accommodates ALL drying strategies a refrigerant dehumidification, desiccant dehumidification, heaters, air movement / exchange why a even the choice to open a window. It's not the tool that dries the structurea it's the restorer's skill in the use of their tools. Courageous leaders are invited to read this book. Stand up and be identified as a bearer of accurate information. Lead in your marketplace. - What REALLY dictates the rate of evaporation? (You may be surprised) - Do you have a drying plan that defines your daily drying objectives in your drying strategy? - Drying is not entirely about psychrometry (Does that make you a heretic?) - Scientific principles and formulas that dictate how much air movement you need. In the climate-controlled buildings of today, moisture problems affect not only the useable life expectancy of the structure, but the comfort and health of the occupants. This reference is the first to apply up-to-date moisture control and treatment techniques in a problem/solution format. Opening with an introductory explanation of the nature and causes of mold, mildew, and condensation, the book gives specific advice on heated, cooled, and combination environments, plus a short course in the dynamics
