McGraw-Hill's "Connect" is a web-based assignment and assessment platform that helps you connect your students to their coursework and to success beyond the course.

Take a New Look at Raven! "BIOLOGY" is an authoritative majors textbook focusing on evolution as a unifying theme. In revising the text, McGraw-Hill consulted with numerous users, noted experts and professors in the field. "Biology" is distinguished from other texts by its strong emphasis on natural selection and the evolutionary process that explains biodiversity. The new 8th edition continues that tradition and advances into modern biology by featuring the latest in cutting edge content reflective of the rapid advances in biology. That same modern perspective was brought into the completely new art program offering readers a dynamic, realistic, and accurate, visual program. To view a sample chapter, go to www.ravenbiology.com

The Laboratory Manual for General, Organic, and Biological Chemistry by Applegate, Neely, and Sakuta was authored to be the most current lab manual available for the GOB market, incorporating the most modern instrumentation and techniques. Illustrations and chemical structures were developed by the authors to conform to the most recent IUPAC conventions. A problem solving methodology is also utilized throughout the laboratory exercises. The Laboratory Manual for General, Organic, and Biological Chemistry by Applegate, Neely, and Sakuta is also designed with flexibility in mind to meet the differing lengths of GOB courses and variety of instrumentation available in GOB labs. Helpful instructor materials are also available on this companion website, including answers, solution recipes, best practices with common student issues and TA advice, sample syllabi, and a calculation sheet for the Density lab.

Exercise Physiology Laboratory Manual is a comprehensive resource for instructors and students interested in practical laboratory experiences related to the field of exercise physiology. This program can be used as both a standalone lab manual or as a complement to any exercise physiology textbook. Students will come away with thorough instruction on the measurement and evaluation of muscular strength, anaerobic and aerobic fitness, cardiovascular function, respiratory function, flexibility, and body composition.

The study of human anatomy and physiology really comes to life in the anatomy and physiology laboratory, where students get hands-on experience with human cadavers and bones, classroom models, preserved and fresh animal organs, histology slides of human tissues, and learn the process of scientific discovery through physiology experimentation. This lab manual is intended to provide students with tools to make the subject matter more relevant to their own bodies and to the world around them. It is an interactive workbook for students: a 'how-to' guide to learning human anatomy and physiology through touch, dissection, observation, experimentation, and critical thinking exercises. Chapter 28 is unique to this Fetal Pig Version of the Lab Manual and contains 16 exercises designed to walk students through dissection and identification of all systems and structures of the fetal pig, beginning with the skeletal system and progressing through all systems.

This laboratory manual for allied health or general microbiology has been written with the student in mind. The authors have used their years of teaching microbiology and microbiology laboratory at all levels to identify and relate the fundamental concepts that are important to the understanding of the science and students' success in their future field. They have included case studies to exemplify the relevance of the science and extensive visual imagery to help students understand and learn the content. Most importantly, the authors hope this manual will help students experience the thrill of bench science and share some of the enthusiasm they have for microbiology, a field of science that is dynamic, exciting and touches every aspect of your life. The third edition lab manual compliments content covered in Cowan's Microbiology Fundamentals: A Clinical Approach, 3/e

Kevin Patton divides the lab activities typically covered in A&P lab into 42 subunits, allowing instructors the flexibility to choose the units and sequence that integrates with lecture material. Basic content is introduced first, and gradually more complex activities are developed. Features include procedure check lists, coloring exercises, boxed hints, safety alerts, separate lab reports, and a full-color histology mini-reference.

Terry Martin, author of the best-selling laboratory manuals to accompany the Hole's Human Anatomy & Physiology texts, has written a stand alone laboratory manual. This series of laboratory manuals (main - no dissection, cat dissection, fetal pig dissection, and rat dissection) will incorporate Terry's clear, concise writing style. These manuals are not associated with any one text and were created for use with any anatomy and physiology text. The manuals also feature incredible artwork and photos. It can be packaged with Ph.I.L.S. 4.0.
