This book incorporates theoretical framework and management cases in discussions on social enterprise in China. The authors look to address two fundamental questions about social enterprises in China that have been very controversial over the years. First, what is social enterprise? This book proposes a framework that defines Chinese social enterprises based on social entrepreneurship, and includes ten case studies for justification. Second, who are well-performed social enterprises with financial viability and proved social impact? The book describes in detail some of the leading social enterprises in China. It is aimed at a wide target audience. Practitioners will learn experience and lessons from the case studies. Academics can use the cases in different teaching contexts, and gain research inspirations from our framework and case studies. Policy makers, accreditation agencies, professional service providers, and institutional investors will learn to identify and evaluate promising social enterprises.

Today, "social entrepreneurship" describes a host of new initiatives, and often refers to approaches that are breaking from traditional philanthropic and charitable organizational behavior. Nowhere is this more true than in the United States—where, from 1995–2005, the number of non-profit organizations registered with the IRS grew by 53%. But, what types of change have these social entrepreneurial efforts brought to the world of civil society and philanthropy? What works in today's environment? And, what barriers are these new efforts breaking down as they endeavor to make the world a better place? *The Real Problem Solvers* brings together leading entrepreneurs, funders, investors, thinkers, and champions in the field to answer these questions from their own, first-person perspectives. Contributors include marquee figures, such as Nobel Laureate Muhammad Yunus, Ashoka Founder Bill Drayton, Jacqueline Novogratz, Founder of the Acumen Fund, and Sally Osberg, CEO of the Skoll Foundation. The core chapters are anchored by an introduction, a conclusion, and question-and-answers sections that weave together the voices of various contributors. In no other book are so many leaders presented side-by-side. Therefore, this is the ideal accessible and personal introduction for students of and newcomers to social entrepreneurship.

An updated edition of a groundbreaking book on best practices for nonprofits *What makes great nonprofits great?* In the original book, authors Crutchfield and McLeod Grant employed a rigorous research methodology derived from for-profit books like *Built to Last*. They studied 12 nonprofits that have achieved extraordinary levels of impact—from Habitat for Humanity to the Heritage Foundation—and distilled six counterintuitive practices that these organizations use to change the world. Features a new introduction that explores the new context in which nonprofits operate and the consequences for these organizations Includes a new chapter on applying the Six Practices to small, local nonprofits, including some examples of these organizations

India is a hub of social entrepreneurship and has a long history of solving social problems through entrepreneurial strategies. The book explores this phenomenon with lessons from more than 120 real-life examples of Indian social ventures. It describes how ordinary individuals can solve, and are solving, some of the most critical social problems that besiege the Indian society. Social Entrepreneurship in India focuses on what 'entrepreneurship' means for social entrepreneurs, and how their efforts are different than other social change agents. Using examples, the author provides insights into the nature of entrepreneurial thinking and the methods used by social entrepreneurs to create their ventures and to make essential products and services reachable to marginalized, remote and fragmented markets and communities in a sustainable manner. Based on the existing successful Indian social ventures and enterprises, the book provides practical insights into the models used to build these successful ventures.

Research on social entrepreneurship is finally catching up to its rapidly growing potential. In *The Search for Social Entrepreneurship*, Paul Light explores this surge of interest to establish the state of knowledge on this growing phenomenon and suggest directions for future research. Light begins by outlining the debate on how to define social entrepreneurship, a concept often cited and lauded but not necessarily understood. A very elemental definition would note that it involves individuals, groups, networks, or organizations seeking sustainable change via new ideas on how governments, nonprofits, and businesses can address significant social problems. That leaves plenty of gaps, however, and without adequate agreement on what the term means, we cannot measure it effectively. The unsatisfying results are apple-to-orange comparisons that make replication and further research difficult. The subsequent section examines the four main components of social entrepreneurship: ideas, opportunities, organizations, and the entrepreneurs themselves. The copious information available about each has yet to be mined for lessons on making social entrepreneurship a success. The third section draws on Light's original survey research on 131 high-performing nonprofits, exploring how they differ across the four key components. The fourth and final section offers recommendations for future action and research in this burgeoning field.
