This major textbook covers all the modules for ECDL Version 4. Written in a straightforward, easy-to-follow style and including sample test questions, this title should be a useful resource for all students studying for the ECDL (European Computer Driving Licence) qualification.

Exactly what you need for the AS Level GCE Double Award in Applied ICT for OCR - this student book matches the specification and provides all information needed for the double award.

Designed to meet the requirements of the OCR leisure and tourism award, this book includes differentiated classroom activities and case studies on current issues to help enhance students' learning. It also offers hints and ideas on making the most of work experience.

For all undergraduate, postgraduate and school-based routes to qualified teacher status, Learning to Teach in the Secondary School is an essential introduction to the key skills and knowledge needed to become a secondary teacher. Underpinned by evidence-informed practice and focussing on what you need to know to thrive in the classroom, the eighth edition is fully updated in light of changes in the field, covers new topics and provides additional guidance on topics such as developing your resilience, using digital technologies, closing the achievement gap and using data to inform your teaching and pupil learning. The text includes a wealth of examples and tasks to demonstrate how to successfully apply theory to practice and how to critically reflect on and analyse your practice to maximise pupil learning. The wide range of pedagogical features supports both school- and university-based work up to

Masters level. Written by experts in the field, the 37 concise units create unit-by-unit coverage that can be dipped into, offering guidance on all aspects of learning to teach including: Managing your workload Lesson planning Curriculum Motivating pupils Promoting behaviour for learning Assessment, marking and feedback Special educational needs and disabilities (SEND) Applying for jobs, developing as a professional and networking Learning to Teach in the Secondary School provides practical help and guidance for many of the situations and potential challenges you are faced with in school. The text is extended by a companion website that includes additional information as well as specific units covering England, Northern Ireland, Scotland and Wales. Supported by the subject-specific titles in the Learning to Teach Subjects in the Secondary School Series, it is an essential purchase for every aspiring secondary school teacher.

A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Endorsed for the OCR J560 GCSE Mathematics Foundation tier specification for first teaching from 2015, this Student Book provides full coverage of the new GCSE Mathematics qualification. With a strong focus on developing problem-solving skills, reasoning and fluency, it helps students understand concepts, apply techniques, solve problems, reason, interpret and communicate mathematically. Written by experienced teachers, it also includes a solid breadth and depth of quality questions set in a variety of contexts. GCSE Mathematics Online - an enhanced digital resource incorporating progression tracking - is also available, as well as Problem-solving Books, Homework Books and a free Teacher's Resource.

4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Problem solving with JavaScript is a lot trickier now that its use has expanded considerably in size, scope, and complexity. This cookbook has your back, with recipes for common tasks across the JavaScript world, whether you're working in the browser, the server, or a mobile environment. Each recipe includes reusable code and practical advice for tackling JavaScript objects, Node, Ajax, JSON, data persistence, graphical and media applications, complex frameworks, modular JavaScript, APIs, and many related technologies. Aimed at people who have some experience with JavaScript, the first part covers traditional uses of JavaScript, along with new ideas and improved functionality. The second part dives into the server, mobile development, and a plethora of leading-edge tools. You'll save time—and learn more about JavaScript in the process. Topics include: Classic JavaScript: Arrays, functions, and the JavaScript Object Accessing the user interface Testing and accessibility Creating and using JavaScript libraries Client-server communication with Ajax Rich, interactive web effects JavaScript, All Blown Up: New ECMAScript standard objects Using Node on the server Modularizing and managing JavaScript Complex JavaScript frameworks Advanced client-server communications Visualizations and client-server graphics Mobile application development

A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Endorsed for the OCR J560 GCSE Mathematics Higher tier specification for first teaching from 2015, this Student Book provides full coverage of the new GCSE Mathematics qualification. With a strong focus on developing problem-solving skills, reasoning and fluency, it helps students understand concepts, apply techniques, solve problems, reason, interpret and communicate mathematically. Written by experienced teachers, it also includes a solid breadth and depth of quality questions set in a variety of contexts. GCSE Mathematics Online - an enhanced digital resource incorporating progression tracking - is also available, as well as Problem-solving Books, Homework Books and a free Teacher's Resource.

This all-in-one guide helps readers contribute to improving institutional performance, boost productivity, and stay connected to the latest library technology topics and tools.

An exploration of when and how - and to what effect - people make the choice to blow the whistle. Case studies from the tobacco industry, to NASA, to the FDA illustrate how individual efforts can and do transform institutions, shape public policy, and serve as a force for democratization.
