### **Public Meetings on Current Good Manufacturing Practice ...**

The principles set forth in this chapter contain recommended minimum current good manufacturing practices for the methods to be used in, and the facilities and controls to be used for, the manufacture of a dietary supplement to assure that such a product meets the requirements of safety, and has the identity and strength and meets the quality and purity characteristics that it is represented to possess.

### **<2750> MANUFACTURING PRACTICES FOR DIETARY SUPPLEMENTS**

The FDA has established good manufacturing practices (GMPs) that

Paperback

companies must follow to help ensure the identity, purity, strength, and composition of their dietary supplements. These GMPs can prevent adding the wrong ingredient (or too much or too little of the correct ingredient) and reduce the chance of contamination or improper packaging and labeling of a product.

### **Dietary Supplements: What You Need to Know**

After a relatively quiet 2017-2018 marked mostly by noticeable decline in FDA inspections of dietary supplements for GMP (good manufacturing practices) compliance, anecdotal evidence indicates the agency has returned to the field and that many of the issues that existed before continue to be gnawing problems for the industry today.
